B.Tech student building hands-on experience in AI engineering, machine learning, and web development through applied projects in data analysis, predictive modeling, and full-stack apps.

PROJECTS

Python Expense Tracker

- Built a Python application to record daily income and expenses efficiently.
- Implemented balance calculations to help users track and manage personal finances.

Data Cleaning and Visualization

- Cleaned raw datasets by handling missing values and removing inconsistencies.
- Created clear visualizations to uncover trends, patterns, and insights.

Predictive Modeling Using Machine Learning

- Built machine learning models to predict future outcomes from historical data.
- Evaluated model performance to deliver accurate, data-driven predictions.

Exploratory Data Analysis (EDA)

- Analyzed datasets using statistics and visualizations to understand underlying data.
- Identified patterns, relationships, and anomalies prior to model building.

Retail and Finance Analysis

- Analyzed retail sales and financial data to measure business performance.
- Surfaced insights into customer behavior and revenue trends to support decision-making.

Portfolio & Online Shopping Websites

- Designed and built a personal portfolio website to showcase projects and skills.
- Built an online shopping website covering product listings and a checkout flow.

SKILLS

AI & Machine Learning: AI Engineering, Predictive Modeling, Machine Learning

Data: Data Cleaning, Exploratory Data Analysis, Data Visualization

Programming: Python, C, Java

Web Development: Web Development, Portfolio & E-commerce Site Design

EDUCATION

B.Tech (In Progress)

Malla Reddy College of Engineering, Telangana

Currently Pursuing

Intermediate (MPC)

Sri Chaitanya College, Telangana
